

Ecomuseums + Museums

The Province of Turin initiated in 1995 the "Project of Material Culture" to create a network of ecomuseums which become the centre of the identity recognition of a community with its territory.

The province network of ecomuseums, which contains ecomuseums dislocated in all of the province, currently presents itself with the following themes: "The Ways of Textiles" (7 ecomuseums), "Memories of Water and Earth" (9 ecomuseums); "Soil and Subsoil" (9 ecomuseums), "The Time of Industry" (5 ecomuseums). To complete the network, the demo-ethno-anthropological museums participate, storming the area and witnessing the activities of peasants and mountain activities of the preindustrial period (10 valdese museums, 40 thematic museums, 18 ethnographic museums).

In the pages of this section, you can consult the file cards of all the ecomuseums and museums, divided for the themes, for the areas and in list. The information of all these hundred realities are regularly updated, anyway, we advise you to call to check the schedule of opening before you visit the ecomuseums and museums.

The file cards about ecomuseums are also available in English version.
